VILLAGE

A little more from life

Your broadband network provider.

Opticomm helps create future-ready connected buildings, communities and cities with fibre-based telecommunications networks, and has guaranteed a Fibre to the Premises (FTTP) connection into every residence. With over 50 service providers nationally, our residents have plenty of choice.

Why we choose Opticomm for our community

- ✓ Residents in the community expect the ultimate in liveability and lifestyle. We recognise that reliable, superfast internet is fundamental to how people live, work and play.
- ✓ Our concept was to ensure that all residents have access to a network that delivers high-quality video streaming with more than enough capacity to support services such as **Netflix®**, **Stan®**, **Foxtel Now®**, **Apple TV 4K®**, **Kayo Sports®** and **YouTube®** at their highest definitions, at peak times, for a seamless viewing experience.
- ✓ Our planning also embraced the needs of larger families with many devices, as well as video gamers and those operating a business from home. Our research revealed that we needed to provide a FTTP network connection to every residence so that we could guarantee the level of service that residents need now and into the future.
- ✓ Service providers on the Opticomm fibre network offer a wide range of internet plans from entry level up to 1Gbps for those looking for higher performance. Business grade services up to 1Gbps are also available.

Visit [opticomm.com.au/connect](https://www.opticomm.com.au/connect) to choose a service provider that suits your needs or call us on **1300 137 800**.

Mon-Fri 8:00am - 8:00pm AEST | Sat 9:00am - 1:00pm AEST

Opticomm is the wholesale infrastructure brand of ASX200 listed Unifi Group Limited (ASX:UWL). The Opticomm brand launched in 2005, as a Licensed Carrier and wholesale network infrastructure operator, Opticomm has been connecting smart communities Australia-wide since 2007.
